Office of Immunization

Washington State Department of HEALTH

As part of our ongoing Highly Pathogenic Avian Influenza (HPAI) preparedness efforts, we are reaching out to request your assistance in sharing information about the Washington State Adult Vaccine Program (AVP) with healthcare providers in your jurisdiction. AVP provides vaccines to participating provider locations serving uninsured adults ages 19 and older.

There are currently two options for enrolling in AVP:

1. **Full AVP Enrollment:** Enrolled providers can order up to five vaccine types through the program and may also request vaccines in response to an outbreak. More information about full AVP enrollment can be found here.

2. **AVP Outbreak Provider Agreement:** This option is available for providers who are not currently enrolled in the standard Adult Vaccine Program. Providers may enroll using the outbreak-only agreement to be prepared to participate in vaccination efforts if an outbreak occurs in their jurisdiction. This option offers a streamlined enrollment process with fewer training and accountability requirements than standard AVP enrollment.
    - Enrolling providers are required to take 1 Storage and Handling training module.
    - Providers enrolled under this agreement are only required to complete vaccine accountability requirements (temperature logs, inventory submissions) if they order and receive outbreak-related vaccines.
    - The Outbreak Provider Agreement is a fillable paper form attached to this email, or you can request the document be sent to you from the AVP Team

Providers interested in AVP enrollment or the Outbreak Provider Agreement, please contact the AVP team at WAAdultVaccines@doh.wa.gov for more information and for the enrollment form.

Thank you for your assistance in sharing these opportunities with healthcare providers in your communities!
